

Urban Housing

REFERENCE CATEGORY
KIND OF BUILDING

Architectural and constructional design of 9-17 storey dwelling houses made of large-panel prefabricated block-sections for repeated application in Moscow and it's suburbs

PROJECT NAME, LOCATION

Morton Group, Moscow, Russia

CLIENT, RESIDENCY

Architectural and constructional design of 9-17 storey dwelling houses made of large-panel prefabricated block-sections.

First place at the international competition of Morton Group, Moscow.

Implementation of a new structural system for the creation of 500,000 m² living space per year in Moscow and it's suburbs.

PROJECT DESCRIPTION

- Architectural design of a consistent modular system including flexible floor plans, different building typologies and aesthetically appealing facades.
- Constructional design of a modern building system made of precast concrete elements.
- Development of innovative connections of the precast elements under consideration of the local climate conditions.
- Conceptual design, detail design, planning up to series-production.
