

CONSTRUCTION OF PRUKSA'S 8-STOREY CONDOMINIUM, THAILAND

PROJECT NAME, LOCATION

Pruksa Real Estate Public Co. Ltd, Bangkok, Thailand

CLIENT, RESIDENCY

Technical support in developing and revealing optimization potentials for all processes from the design to the construction of the buildings with the overarching objective to reduce the construction period decisively.

PROJECT DESCRIPTION

- On-site-verification of the currently applied processes for superordinate design, architectural and landscape design, design of building system, mechanical engineering, production of precast elements, delivery, construction site logistics, and assembly.
- Evaluation of optimization potentials for all above mentioned processes on the basis of the identified status-quo of the design and execution processes.
- Application of "Building Information Modeling" (BIM).
- Preparation of specific recommendations.
